INFORMATION ON THE COMPANY 25

At the same time, demand in the power equipment market was rapidly shifting to environmental, efficiency and renewable energy-oriented products. The equipments for alternative energies, such as nuclear power, wind power and so on, were in great demand, while the demand for conventional thermal power equipment declined with a relatively stronger demand from the international market.

All financial indexes of the Company for the first half -year declined to different extents due to changing market demand and an increase in raw material prices.

During the first half of the year, the value of new contracts secured by the Group amounted to Rmb13.2 billion, representing a decrease of 62% as compared with the same period last year. The power equipment market has entered a period of adjustment after two years of rapid growth, and market demand declined significantly.

Although the Group's production during the first half of the year remained relatively high, total output decreased slightly from the same period last year because the delivery dates of several orders were postponed. 22 utility boilers with a total capacity of 9,535MW, a decrease of 31.28% as compared with the same period last year; 31 power plant turbines with a total capacity of 11,092MW, an increase of 4.11% over the same period last year; 31 power plant turbine generators with a total capacity of 11,060MW, a decrease of 13.02% as compared with the same period last year; and 14 sets of hydropower turbine generator unit with a total capacity of 2,717.2MW, a decrease of 8.76% as compared with the same period last year, were completed during the period.

For the first half of 2009, the Group recorded a turnover from principal business activities of Rmb12,842.12 million, representing a slight decrease as compared with the same period last year. In particular, turnover of thermal power main units was Rmb9,729.33 million, a decrease of 2% as compared with the same period last year; turnover of hydropower main units was Rmb819.89 million, an increase of 6.20% over the same period last year; turnover of power plant engineering and services was Rmb1,297.75 million, an increase of 1.89% over the same period last year; and turnover of power plant auxiliaries and parts was Rmb256.67 million, an increase of 19.53% over the same period last year. The turnover of AC/DC motors and other products and services was Rmb738.48 million, an increase of 10.48% over the same period last year.

During the period, the export sales of the Group amounted to Rmb1,292.96 million and accounted for 10.07% of the Group's total turnover. The major export destinations were countries in Asia and Africa.

During the period, the cost of the principal operations of the Group was Rmb11,291.58 million, an increase of 3.85% over the same period last year.

During the period, the Group's gross profit from its principal business activities was Rmb1,550.54 million, a decrease of 21.82% as compared with the same period last year. The profit margin was 12.07%, a decrease of 3.36 percentage points as compared with the same period last year.

Among them the gross profit from thermal power main units was Rmb1,212.59 million and the profit margin was 12.46%, a decrease of 4.08 percentage points as compared with the same period last year. The gross profit from hydro power main units was Rmb165.98 million and the profit margin was 20.24%, which remained stable against the same period last year. The gross profit from power plant engineering and services was Rmb3.91 million and the profit margin was 0.30%, a decrease of 0.63 percentage points as compared with the same period last year. The gross profit from power plant auxiliaries and parts was Rmb56.14 million and the profit margin was 21.87%, a decrease of 3.57 percentage points as compared with the same period last year. The gross profit from AC/DC motors and other products and services was Rmb111.92 million and the profit margin was 15.16%, a decrease of 2.57 percentage points as compared with the same period last year. The main reason for the decrease in the profit margin of our major products was a substantial increase in the cost of products during the period, which was detrimental to our profit margin, due to the fact that the raw materials consumed to produce our products sold during the period were purchased in the fourth quarter of 2007 and the first half of 2008 when the prices were at their historic heights.

For the first half of the year, the Group's operational and administrative expenses amounted to Rmb1,145.53 million, a decrease of Rmb41.73 million or 3.52% as compared with the same period last year.

As at 30th June 2009, the total assets of the Group amounted to Rmb51,102.89

In the second half of 2009, the Chinese government will continue to put the promotion of fast yet steady economic development as the top mission in its economic policies, maintain the continuity and stability of its macroeconomic policies and consolidate the stable and rising trend of the economy.

With a accelerated pace of adjustment of the national energy consumption structure, the power equipment manufacturing enterprises will face double challenges in maintaining the stable growth in their operating results and making adjustment to their products mix.

In the second half of 2009, the Company will timely monitor market changes, deploy scientific production plans, implement dynamic control and make endeavors to satisfy the demand of its customers. The Company will continue to actively expand domestic and international markets, consolidate its traditional markets and speed up the development of new markets.

Furthermore, the Company will undertake a comprehensive internally controlled auditing project, promote the establishment of an internal control system, further strengthen its cost control, implement energy conservation and emission reduction measures, and improve its management standard and ability to mitigate risks.

In the second half of 2009 as well as the coming years, the Company will persist in improving its self-innovation ability and accelerating the adjustment to its products structure so as to meet the requirements of the national energy policies and changes in the market demand.

The Board will strive to create a supportive environment for the Company's management to lead the entire staff to fight for further growth. The Board is fully confident in this regard.
